

LexisNexis Unveils Enhancements to its Statistical Suite

Improved functionality, more timely updates and new IMF data help researchers locate more comprehensive results faster

Washington, DC, June 22, 2010 – LexisNexis®, a leading global provider of content-enabled workflow solutions, today announced enhancements and content additions to LexisNexis® *Statistical Insight* and LexisNexis® *Statistical DataSets*. The new functionality simplifies search retrieval, and together with new content, strengthens the overall user experience. The products, which complement each other, offer access to statistics produced by Federal and State agencies, business and private organizations, and research institutions, as well as the ability to customize the data based on research needs. Both updated products will be showcased at the American Library Association (ALA) Annual Conference, June 25-28, 2010, in Washington, DC.

“We are working very hard to make statistical research easier than ever,” said Laura Salmon, vice president of Library Research Solutions at LexisNexis. “By working closely with our customers, we are able to integrate their feedback into our products. Many recent enhancements are a direct result of the suggestions made by them.”

Here are just a few of the changes that were recently implemented:

- New data from the International Monetary Fund (IMF) was added to LexisNexis Statistical DataSets
- LexisNexis Statistical DataSets users are now able to identify news stories and other documents related to a statistical time series and link directly to the source
- Formatted output features have been added to give LexisNexis Statistical DataSets users a sophisticated version of the charts with bibliographic data
- Exact phrase and proximity search options have been incorporated into LexisNexis Statistical Insight to help novice and professional researchers get relevant results faster
- New data is being loaded as soon as an abstract is written and edited; abstracts and PDF files are current through June 2010.

To see the product in action, stop by booth #1934 at the 2010 ALA Annual Conference in Washington, DC or visit <http://academic.lexisnexis.com> for more information.
